PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience in .NET Core, C#, JavaScript, PostgreSQL, and Docker. At 42 Kocaeli, I gained a systematic thinking discipline, enabling me to contribute to sustainable architecture, CI/CD, and performance optimization. At Solvent Software, I built API integrations processing 10,000+ patient records and developed real-time solutions with SignalR. I aim to add value by taking end-to-end responsibility in scalable software projects.

EDUCATION

Anadolu University

Eskişehir, Türkiye | October 2024 – Present

Economics Bachelor's Degree

Currently pursuing economics education focused on analysis and data interpretation..

42 Kocaeli (École 42)

Kocaeli, Türkiye | January 2022 – Present

IT Architecture Specialist (RNCP6 – RNCP7)

Project-based, peer learning model. Currently completed the Common Core level focused on programming fundamentals and system engineering.

Dumlupınar University

Kütahya, Türkiye | November 2020 – January 2024

Information Management Associate Degree

Graduated with education focused on data management, information systems, and business processes.

WORK EXPERIENCE

Solvent Software

Kocaeli, Türkiye | August 2024 – January 2025

Full-Stack Developer

Contributed to the redevelopment of the Hospital Information Management System (HBYS) at Solvent Software, implementing MHRS and E-Nabız integrations, fixing legacy issues, and optimizing data flow. Developed an independent SMS microservice and a licensing API for user management, while adding real-time communication using ASP.NET Core, SignalR, Docker, and MSSQL. Achieved improved system stability, reduced manual errors, and automated license processes within 6 months.

Kurgu Electronics

Kocaeli, Türkiye | January 2024 – February 2024

Intern

Performed responsive design optimizations using Bootstrap on the frontend interface of corporate websites developed with .NET MVC framework at Kurgu Electronics. Contributed to development and testing processes within the team for projects with MSSQL database integration.

PROJECTS

42 Kocaeli (École 42) - Common Core & Advanced Curriculum | January 2022 – Present

Specialized in system-level programming, algorithms, and UNIX processes through 42 Kocaeli's project-based, peer-learning curriculum. Developed projects including a dating app (FastAPI, Next.js), Instagram-like platform (Django), mobile app (Kotlin), web security penetration test, and Assembly libraries. Gained practical experience in system programming, web security, mobile development, and C/C++ Assembly.

Nasilbifirma - Company Evaluation Platform | June 2024 – Present

Developed a full-stack web platform that enables community-based evaluation of companies. Focused on user-centered design and scalable architectural principles using Next.js frontend, .NET Core backend, and MS SQL Server database technologies. Played an active role as a founding partner in system architecture design, idea development, and planning processes.

ADDITIONAL SKILLS

Technical Skills

Backend: .NET Core, MVC, C#, Entity Framework, Python, Django, FastAPI, C, C++

Frontend: Next.js, Angular, HTML, CSS, JavaScript, Tailwind

Database: PostgreSQL, MSSQL, Supabase, Firebase

DevOps & Tools: Docker, Docker Compose, Git, Linux, RabbitMQ, SeriLog

Architectural Patterns: N-Layered, Onion Architecture, RESTful API, SignalR

Languages

English (Intermediate level)

ACHIEVEMENTS

Travel Hackathon Participation

Istanbul, Türkiye | November 2022

Experienced innovative problem-solving approach by collaborating with cross-functional teams to develop travel-focused software projects under time constraints.

Blockchain, NFT and Metaverse Hackathon Participation

Kocaeli, Türkiye | June 2023

Participated in a technology-focused hackathon where I contributed to developing blockchain-based applications using modern web technologies.
